

DocCave

SAVE IT TO THE CAVE!

+CITIESDIGITAL By Cities Digital, Inc.

The Safe Way to Share Documents With Clients!

The **DocCave** from Cities Digital is a private document sharing website.

How does **DocCave** help you?

Let's say you write up contracts when you work with your clients. You KNOW they are going to call you several times to get a copy. Why not send it to DocCave, where they can find it easily whenever they need to, safely and securely while saving you time and money.

DocCave is efficient.

How does **DocCave** work?

Sound mysterious? No, it's simple. Think of the efficiency of sharing customer invoices with hundreds or thousands of clients, or sharing important contracts with your financial clients. While your clients will have private access to their documents, all files are in read-only format, so you stay in control.

DocCave improves client relationships.

How is **DocCave** different?

DocCave is the ONLY system that comes fully integrated with **Laserfiche** document management systems. As a user you may choose documents to share by applying a "tag" within Laserfiche. When you do this, it securely and instantly transmits to DocCave servers, making private access simple. Entire client or vendor lists can be imported into DocCave with automated password creation. Confirmation emails are sent to clients or vendors. You can also custom-brand your DocCave site for a more personalized feel.

DocCave is unlike anything else out there today.

What does **DocCave** cost?

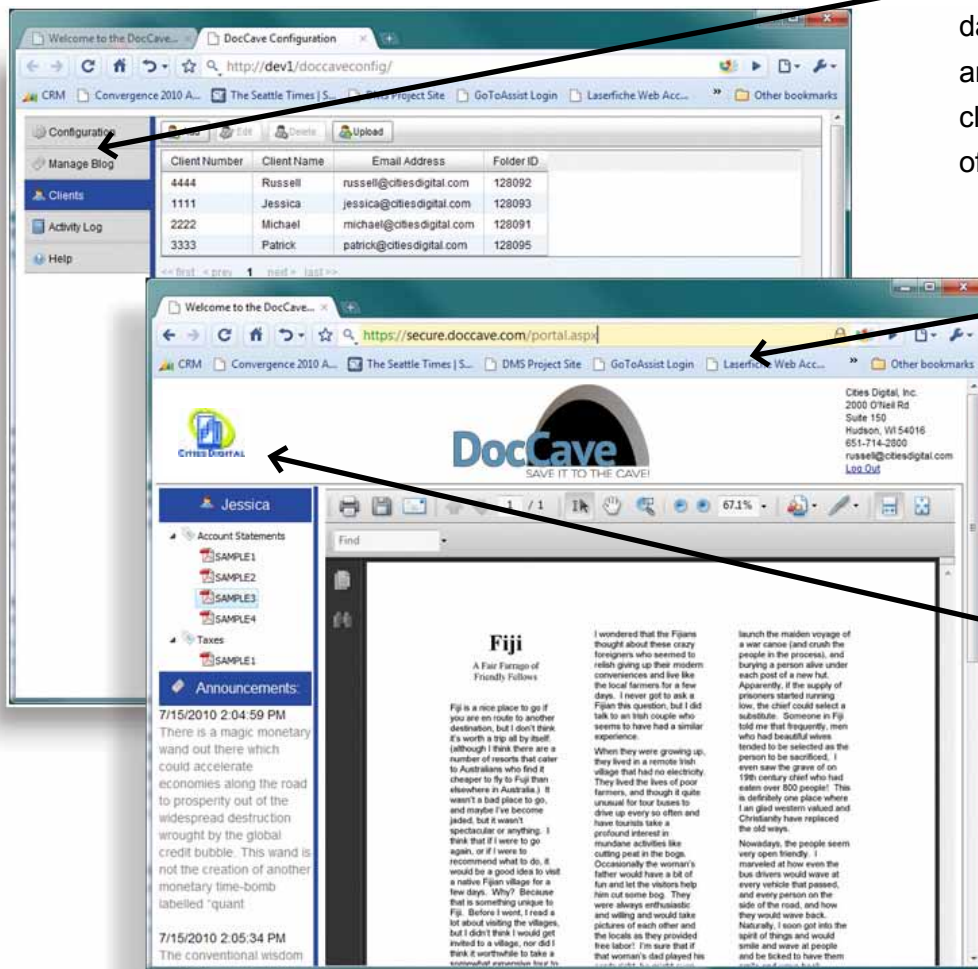

A customized DocCave experience begins at \$300/mo. Contact us today at 651.714.2800 or sales@citiesdigital.com, and we'll customize a DocCave package that's just right for you.
