Automatic Email Archive  
Anywhere You Need It

**MAGNIMAIL ONLINE** is an email archiving system designed to provide automatic archiving of all your emails. This SAAS Solution provides for archiving from any email server that has auto-forwarding capabilities, or manually with any email client.

MAGNIMAIL ONLINE provides auto-archiving as well as dynamic charts and graphs for a detailed overview of messages archived by Rule Set, User, and Keyword.

MAGNIMAIL ONLINE offers solutions to common problems by:

- Providing managers access to employee email to give communications guidance.
- Allowing for capture and store message history from all employees.
- Reducing daily message review headaches.

**MAGNIMAIL ONLINE** features:

- Automatic archiving of all inbound and outbound emails.
- Provides for archiving from any email server that has auto-forwarding capabilities, including Exchange.
- Emails archived in non-proprietary format.
- Includes rules-based filtering of domains, addresses and auto-filing of emails.
- Spam Filtering.
- System vitals dashboard for monitoring emails processed from each server and user.
- E-discovery screen for manager's or compliance officer's search of email.
- Query email by date, domain, user or full text search.
- Keyword quarantine for review.
